

A Clear Choice

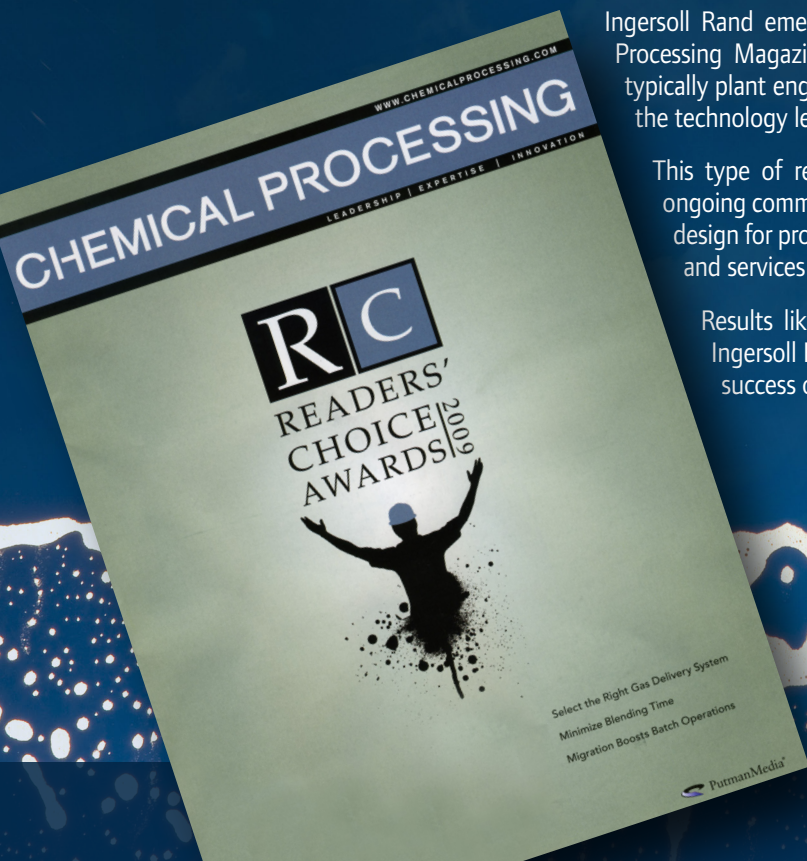

Ingersoll Rand Voted the Chosen Leader in Compressed Air Technology

Ingersoll Rand emerges a clear winner in the Readers Choice Survey for Chemical Processing Magazine. Targeted at the chemical processing industry, readers are typically plant engineers and technical personnel. 33% considered Ingersoll Rand the technology leader in air compressors vs. 15% for Atlas Copco.

This type of recognition from our customers reiterates Ingersoll Rand's ongoing commitment to innovation, technology and performance-driven design for proven reliability, providing our customers with the products and services that enhance their efficiency and productivity.

Results like these are a true reflection on the employees of Ingersoll Rand and the pride they take in contributing to the success of our customers and our company.
