Drum Guards

Drum guards are available for all Ingersoll Rand winches and are highly recommended to prevent inadvertent contact with moving winch parts.

Drum guards may be ordered for installation at the factory prior to shipment ("G" = drum guard).

In certain cases, such as Man Rider winches and CE models (for compliance with the European Machinery Directive), drum guards are required as a standard feature in order to meet a regulation or local requirements.

Man Rider winch

CE Model winch

Important note:

Ingersoll Rand drum guards are designed to meet ANSI / ASME B30.7, the European Machinery Directive (CE) and other applicable standards.

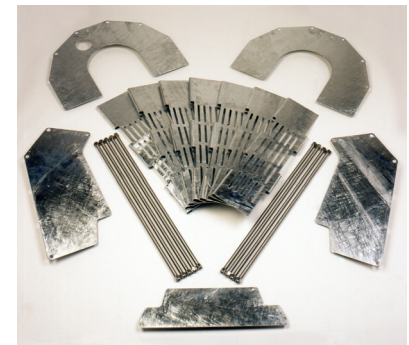

The use of other than genuine Ingersoll Rand parts may result in safety hazards, decreased performance and increased maintenance and will invalidate all warranties.

Non-Ingersoll Rand approved drum guard

LS2000R-L-G

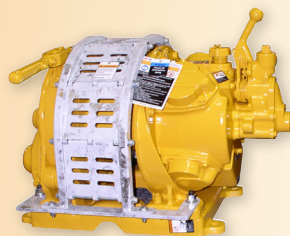

Drum guard kit

Drum guards can also be ordered for winches as field retrofit kits.

K6U (discontinued 1995)

HU40 (discontinued 1996)

Ingersoll Rand can provide quotations for drum guards on winches that are discontinued and no longer in production.
